CLIENT

Lemkin Realty

INDUSTRY

Real Estate & Property Listing

PLATFORM

Custom WordPress CMS

Modern Real Estate Platform with Advanced Property Experiences

Lemkin Realty delivers advanced property browsing, Buy & Rent listing management, multilingual support, and CMS-driven real estate operations through a scalable WordPress platform built for modern property businesses.

Advanced Property Search

Advanced property search and filtering for buy & rent listings with property information and location-based browsing.

Dynamic CMS Content

Manage properties, galleries, amenities, pages, and website content directly from the admin panel.

Responsive User Experience

Smooth property browsing, responsive layouts, and optimized viewing experiences across all devices.

Property Management

Centralized property handling with featured listings, image galleries, contact details, & pricing management.

01

Building Buy and Rent filtering systems with property amenities, locations, pricing, and search management.

Property Search

02

Handling dynamic property listings, galleries, featured properties, and detailed property information efficiently.

Property Management

03

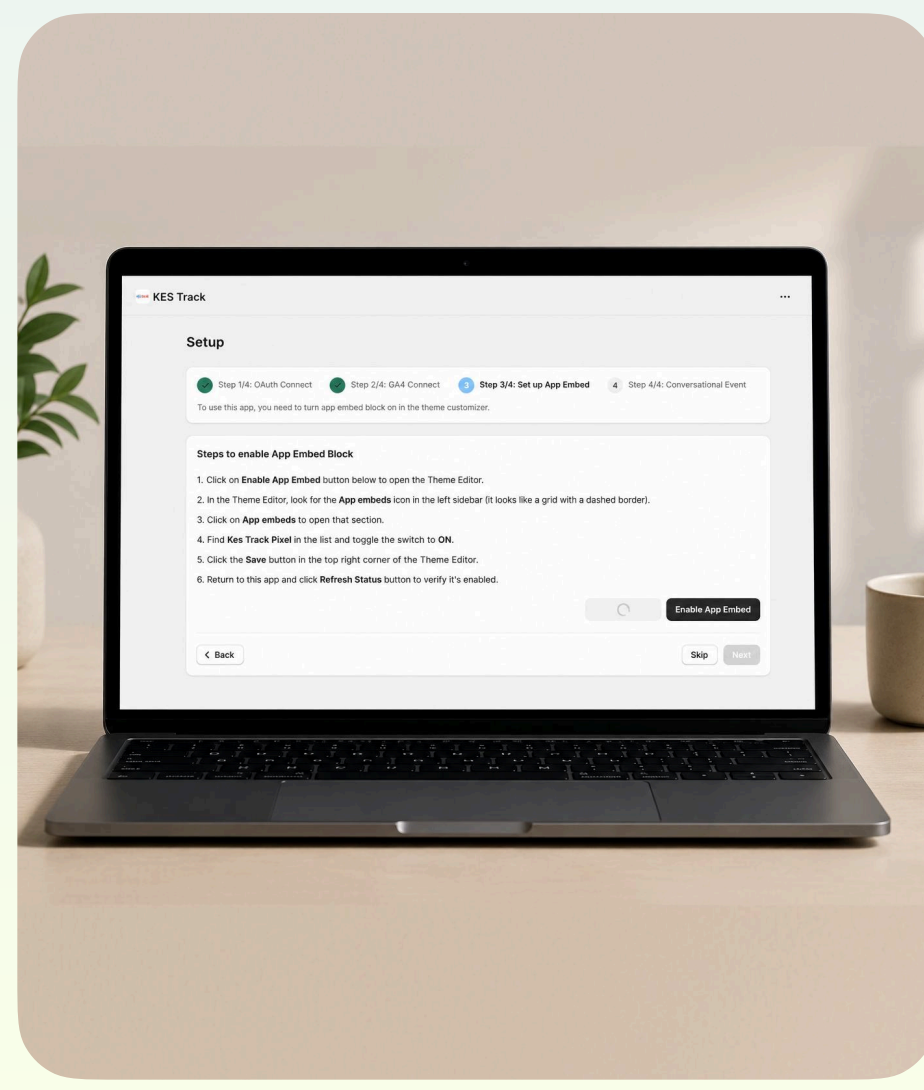

Maintaining responsive layouts, styling consistency, and smooth functionality across multiple language versions.

Multilingual Support

04

Allowing administrators to manage properties, pages, amenities, and content without technical assistance.

CMS Flexibility

05

Displaying high-resolution property images clearly within smaller responsive sections without blur issues.

Image Optimization

PAIN POINT

Challenges Confronted

Managing advanced property search functionality, multilingual website support, responsive property layouts, and dynamic CMS-driven property management created several technical and operational challenges across the real estate platform.

SOLUTIONS

Solution Provided

Scalable real estate solutions engineered to improve property management, advanced search functionality, multilingual experiences, and centralized CMS operations.

FULLY DYNAMIC PROPERTY LISTING WEBSITE

Delivered a complete CMS-driven real estate platform with advanced property management functionality.

MULTILINGUAL SUPPORT

Integrated multilingual functionality and optimized CSS layouts to maintain responsive design consistency across all languages.

FEATURED PROPERTY FUNCTIONALITY

Added featured property selection options so admins can highlight important listings on different sections of the website.

DYNAMIC PROPERTY DETAILS

Built detailed property pages with galleries, contact details, pricing, amenities, and location information for better user experience.

ACF PRO CONTENT MANAGEMENT

Used ACF PRO to create flexible backend fields so admins can manage all website pages and property content easily.

IMAGE OPTIMIZATION & CSS HANDLING

Implemented custom CSS techniques to properly fit high-resolution property images into smaller layouts without losing image quality or causing blur issues.

RESULT

Results & Impact Metrics

The completed platform improved property management efficiency, property discovery, multilingual accessibility, content administration, and overall user experience across the real estate website.

Fully Dynamic Property Listing Website

Fast property discovery with smart search and filters.

Centralized Property Management

Manage properties, pricing, galleries, and details.

Seamless Multilingual Functionality

Consistent experience across multiple languages.

Improved Listing Visibility

Featured listings receive greater user attention.

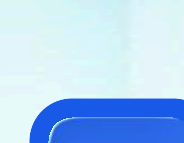

Flexible CMS Administration

Easy content and property management with ACF Pro.

Scalable WordPress Infrastructure

Built for future growth and feature expansion.

Additional Insights

Multilingual Accessibility

Smooth experience across all supported languages.

Administrative Efficiency

Simplified property and content management.
